**Lowest
cost way
to connect
split-system
air conditioners.**

**Halstead
pre-insulated
copper tube kits.***

Compare: your cost of tubing, insulation, labor and scrap versus the Halstead factory-processed kit that eliminates all of the assembly work and lowers your cost. Halstead tubing is clean, uniformly round refrigeration-quality soft copper with a holding charge and sulphur-free rubber plugs. Insulation is same high quality closed-cell type used by OEM's. Every Halstead pre-insulated copper tube kit is manufactured to the highest OEM quality standards.

See your wholesaler, whose inventories are backed by 10-day maximum factory shipment from Halstead.

Lengths:	50' 40' 35' 30' 25' 20' 15'
Insulation Wall Thickness:	3/16" 1/4" 3/8" 1/2"
Suction Line OD:	1/2" 5/8" 3/4" 7/8"
Liquid Line OD:	1/4" 5/16" 3/8"

*Available with plain ends or flare nuts.
